INTRODUCTION

Second-year Computer Science (Data Science) undergraduate at Vellore Institute of Technology with a strong academic record (CGPA: 8.75/10). Demonstrates a consistent commitment to learning and academic excellence, along with the ability to adapt and perform effectively in dynamic, team-oriented environments. Seeking internship opportunities to apply technical knowledge, strengthen problem-solving skills, and gain practical industry experience.

EDUCATION

Vellore Institute of Technology, Vellore — Jul 2024 – May 2028
Bachelor of Technology (B.Tech), Computer Science (Data Science) — **CGPA: 8.75/10**

New Times International School — Jun 2022 – May 2024
Class XII — **Percentage: 82%**

St. Arnold's Central School — 2010 – 2022
Class X — **Percentage: 91.5%**

SKILLS

- **Programming:** Python (Pandas, NumPy), Java, C, C++, JavaScript, R, SQL
- **Database:** MySQL
- **Web Development:** HTML, CSS
- **Tools:** Git, VS Code, Notepad++, IDLE
- **Core Concepts:** Data Structures and Algorithms, NumPy, Pandas, Matplotlib, Seaborn

PROJECTS

E-Commerce Sales Customer Analytics Dashboard
Technologies Used: Power BI, MySQL, DAX, Data Modeling, Excel

- Built an e-commerce Power BI dashboard to analyze sales, retention, and inventory trends.
- Extracted and preprocessed transactional data from MySQL using optimized SQL queries.
- Designed a star schema data model and authored custom DAX measures for core KPIs.
- Created interactive reports with drill-throughs and dynamic filters for business insights.

Food Delivery Time Prediction
Technologies Used: Python, Pandas, NumPy, Scikit-learn, Random Forest Regressor, Linear Regression

- Developed a regression model to estimate food delivery arrival times based on distance, traffic, and weather conditions.
- Conducted exploratory data analysis, handling missing values, outlier detection, and feature scaling using Pandas and NumPy.
- Trained and tuned regression models (Linear Regression, Random Forest Regressor) to capture non-linear relationships.
- Evaluated model accuracy using Mean Absolute Error (MAE), Root Mean Squared Error (RMSE), and R^2 score.

UK Road Accident Severity Prediction
Technologies Used: Python, Pandas, NumPy, Scikit-learn, Random Forest, Decision Tree

- Developed a machine learning model to predict road accident severity using the UK STATS19 dataset.
- Performed data preprocessing, feature engineering, and one-hot encoding for model training.
- Trained and evaluated a Random Forest classifier using accuracy, precision, recall, and F1-score.
- Visualized feature importance to identify key factors influencing accident severity.

Personal Portfolio Website
Technologies Used: HTML, CSS, JavaScript

- Built a responsive portfolio website to showcase projects and technical skills.
- Implemented responsive layouts using HTML, CSS, and JavaScript.
- Added interactive features including smooth scrolling and dynamic UI components.

CERTIFICATIONS

- **Artificial Intelligence and Machine Learning in Business** – Udemy
- **Google Cloud Skill Badges (2025)**
  - Introduction to Responsible AI

- Introduction to Large Language Models
- Introduction to Generative AI

VOLUNTEERING EXPERIENCE

Volunteer – Gravitas & Riviera, VIT Vellore
Halls & Refreshment Team

- Supported operations for large-scale technical and cultural festivals with high participant turnout.
- Collaborated with volunteers and coordinators to ensure smooth event execution.

ACHIEVEMENTS

- Maintained a CGPA of **8.75/10** in B.Tech (Computer Science - Data Science).
- Selected as a volunteer for VIT's flagship events, **Gravitas** and **Riviera**.
